DANIEL® SENIOR ORIFICE FITTING MAJOR REFURBISHING KITS

Comprehensive repair kit equipped to completely refurbish a Senior Orifice Fitting with genuine Daniel parts

Daniel Senior Orifice Fitting Major Refurbishing Kits create an effective way to restore your equipment without the added cost and associated downtime required when purchasing a new unit. Our refurbishment kits consist of a duplicate of every trim part found in a Daniel Senior Orifice Fitting, (with the exception of the body, top, plate carrier or seal ring).

To help ease the maintenance task and result in a faster start up time, each kit is shipped with supporting documentation including:

- **Bill of Materials**
 - A printed, itemized list that matches each part in the kit with its corresponding part number, quantity and location in the fitting
- **Installation Instructions**
 - A detailed, step-by-step process with visual aids illustrating how to install each replacement part
- **Torque and Tightening Guide**
 - Supplemental information on bolted joint assemblies consisting of suggested torque values and sequencing instructions

Available Configurations

2 to 12-in, ANSI 600, NACE TRIM,
double ended shafts 10 to 12-in, ANSI 600,
A TRIM, double ended shafts

Certifications and Compliances

Parts meet all requirements and recommendations
for accurate flow measurement such as
AGA 3 / API 14.3 and ISO 5167

Benefits

The use of genuine Daniel parts helps guarantee the product integrity and ensure your operations are running smoothly and safely.

Industry-competitive prices

Quick delivery

Intuitive supporting documentation for streamlined repairs and reduced downtime

Our Refurbishing Kit is a duplicate of every trim part found in a Daniel Senior Orifice Fitting

With over 90 Years of experience, Daniel is the only manufacturer that has the knowledge and experience to engineer and offer superior products that are trusted to provide the most reliable and accurate measurements in the global oil and gas industry.
