# DANIEL® CORIOLIS MASS FLOW METER PRODUCT GUIDE

# **ADVANCED MASS METERING TECHNOLOGY**

# **TYPICAL APPLICATIONS**

- Custody Transfer
- · Reactor Feed Ratio
- Control
- · Density
- Measurement
- Batch Control

# **INDUSTRIES**

- Chemicals
- Minerals
- Oil & Gas
- Power Generation
- Water

# INTRODUCTION

The Daniel® Coriolis Mass Flow Meter delivers best-in-class performance for mass flow, density, and temperature measurement, while also calculating volume flow, total flow, and fluid composition in real-time.

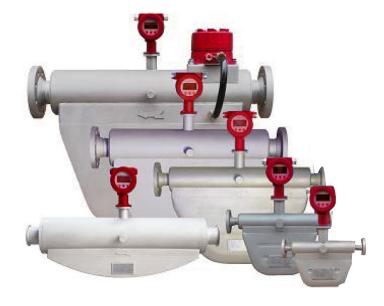

The meter is available in two sensor styles:

- · M-Type Coriolis
- S-Type Coriolis

Each sensor type is offered in both **compact and remote configurations** to suit different installation requirements. A typical mass flow meter consists of a **flow sensor** and a **signal transmitter**.

- The **flow sensor** contains two vibrating flow tubes that generate signals detected by pickoff sensors.
- The signal transmitter uses Digital Signal Processing (DSP) and a Dynamic Vibration Balance (DVB) circuit to ensure fast response and high accuracy.

Field diagnostics, configuration, and data recording can be easily managed via HART or Modbus RTU communication.

www.daniel.com \

# **KEY FEATURES**

- No moving parts for enhanced durability and longer service life.
- · Customizable flow connectors and installation lengths.
- Excellent repeatability (±0.05% of flow rate)
- · Optional Net Oil functionality.
- NIST Traceable and NTEP Certified for custody transfer.

# **KEY BENEFITS**

- Increased productivity with reduced maintenance.
- · Lower installation costs.
- · Improved product quality.
- · Simplified Net Oil measurement without requiring a PLC or RTU.

# **CONSTRUCTION MATERIALS**

- Tubes: SS316L (Hastelloy C optional).
- Flow Splitter: SS304 (SS316L and Hastelloy C optional).
- Flanges: SS304 (SS316L and Hastelloy C optional).
- Housing Case (Non-Wetted Parts): SS304 (SS316L optional).
- Compliance: NACE MR 0175/0103 compliant.

### CERTIFICATES

National Type Evaluation Program

# **APPLICATIONS**

Daniel's mass flowmeter is designed to perform reliably in the most complex and challenging environments, handling liquid, gas, and slurry applications across multiple industries.

| APPLICATION         |  |  |  |  |  |
|---------------------|--|--|--|--|--|
| Process Fluids      | Typical Applications   | Industries   |  |  |  |
| Liquid, Gas, Slurry | <ul> <li>Custody Transfer</li> <li>Reactor Feed Ratio</li> <li>Density Measurement</li> <li>Batch Control</li> </ul> | <ul> <li>Chemicals</li> <li>Machinery</li> <li>Minerals</li> <li>Oil &amp; Gas</li> <li>Power Generation</li> <li>Water</li> </ul> |  |  |  |

### **APPLICATION**

# **MEASUREMENT PRINCIPLE**

The **Daniel® Coriolis Mass Flow Meter** operates using two parallel flow tubes vibrating at their **resonant frequency**. As fluid flows through the tubes, **Coriolis forces** cause slight deformation, detected by sensors.

- The phase shift between tube oscillations is proportional to mass flow rate.
- The resonant frequency change allows for density measurement.
- Integrated temperature sensors provide real-time temperature compensation for maximum accuracy.

# **TECHNICAL SPECIFICATIONS**

### **FLOW RATE:**

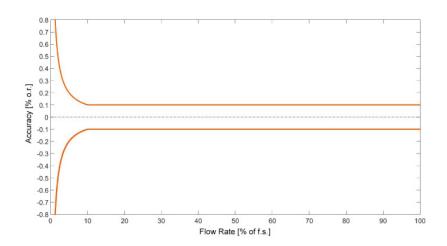

- Mass Flow Rate (Max): 3,307,000 lb/h (1,500,000 kg/h)
- Volumetric Flow Rate (Max): 6,604 GPM | 9,434 BPD | 1,500,000 L/h

## **PRESSURE:**

• Maximum Pressure: 3,705 PSI (26 MPa) | Optional: 5,800 PSI (40 MPa)

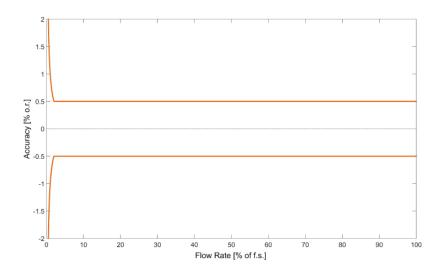

# **ACCURACY FOR LIQUIDS:**

### (FIVE-POINT CALIBRATION, BASIC ACCURACY: ±0.1 %)

### **ACCURACY FOR GAS:**

### (FIVE-POINT CALIBRATION, BASIC ACCURACY: ±0.5%)

X Specifications are subject to change without notice. Users should confirm with the manufacturer that the specifications are current before use. The manufacturer assumes no responsibility for the application of specifications that have been updated or are no longer valid.

### TRANSMITTER OPTIONS

- Direct Mount or Remote Mount
- OLED Display with 3 Optical Keys
- Power Supply: 85-265 VAC or 18-36 VDC
- Outputs: 4-20 mA & Pulse/Frequency
- Optional Communication: HART or Modbus RS485

### **AVAILABLE SENSOR TYPES**

### **M-Type Coriolis**

### Size from 1/8" to 10"

The **M-Type Coriolis** features two V-shaped tubes housed in a casing with a significantly smaller radius compared to conventional U-shaped Coriolis sensors. This compact design reduces pressure loss and provides a space-saving installation footprint, making it ideal for applications where low-pressure drop and minimal space are critical.

### S-Type Coriolis

### Size: 1" to 4"

The **S-Type Coriolis** features two tubes with reduced curvature, resulting in a significantly smaller radius compared to conventional M-shaped Coriolis sensors. This compact design reduces installation space requirements, making it ideal for processes where footprint is a critical factor.

<sup>%</sup> Specifications are subject to change without notice. Users should confirm with the manufacturer that the specifications are current before use. The manufacturer assumes no responsibility for the application of specifications that have been updated or are no longer valid.
